Docker

On this page we describe what you need to run an LLM at home i.e self host it on your own hardware at home ;) Yes that means that you won't be providing all you search queries to

Google is losing lots of money

1. It is at a time where it serves up more queries than ever before
2. Each query is more expensive than ever before
3. Earns less money per query than in its entire history of search.

This is a huge problem for a company like Google, so why do they continue producing this ? It will only make the company less valuable.
