4. Import & Exporting Books

Now, one great thing about Bookstack is that it is also extremely simple to export a shelf, book, chapter or page to another Bookstack instance. This is great since you can copy and past basically a whole book from one hub or a society and copy it into your local hub's Bookstack's instance.

1. Simply click on the book you want to export
2. Export it as a zip file
3. Go to the new instance
4. Click on the Books Menu item in the top right corner
5. Click on import
6. Import your exported book
7. Voila! You did it ;) Yes it is that simple and it even keeps it's whole structure.
