05. Family Plan

Ente also allows you to share your storage with your family members. Then you are not limited to the 10GB that you get by default but but are limited to amount of storage your family member that created the family group provides you with.

1. You can have a maximum of 5 members in the Family account which including yourself is a total of 6 people.
2. You can only create one family group per account

To setup a new family group you do the following

1. Open up Ente
2. Click on the Hamburger menu in the top left corner
3. Click on Family
4. Then in the top right corner you can click on the three vertical dots ⋮
5. Then select create new Family Group
6. Give it a name
7. Then invite members by sending them an invitation email! Note that the email can end up in the SPAM so make sure you tell this to your family members if they cannot find the invitation email.

Then it is up to you if you want to give your family members limited storage of your total space or if all is shared and members can use as much as you the owner has to their capacity.
