Google Play Games is an online video gaming service by Google for Windows 10 and 11, Chromebooks, and Android devices.

Google Play Games on Android, launched in 2013, features mobile achievements, leaderboards, gamer profiles, saved games and achievements which give XP to level up. The instant play feature is retired since December of 2025. The maximum level a user can go is currently 99, which used to be 50. Google Play Games for PC Beta launched in 2021 with a set of Android games optimized for Windows and Chromebooks. The user gamer profile syncs across Google Play Games on PCs and mobile devices. A Google Account is required to use most of the features Google Play Games has.

Google Play Games enhances your gaming experience by offering features like real-time multiplayer gaming, cloud saves, and achievements, which are not available when simply installing games as standalone apps. It also allows you to play games without installing them through Google Play Instant, making it more convenient.
