Docker Deployment

Then choose again the port that is next available in your network. Then it does not need to be port 5173

Then you should generate a cloud key

```
openssl rand -hex 32
```

Then use this key to fill in here

```
MINDWTR_CLOUD_AUTH_TOKENS=your_token_here
MINDWTR_CLOUD_CORS_ORIGIN=http://localhost:5173
```
