About

Dedicated to offering users a precise and efficient one-stop travel experience, Tencent Map provides travel and location-based services, such as intelligent route planning, navigation, real-time traffic updates, and indoor maps.

It provides precise navigation in over 200 cities in China with map browsing, address inquiry, local attraction search, navigation, public transport routes, transit station inquiry services, as well as integration with over 2,000 indoor maps from major airports, train stations, and shopping malls, making traveling more seamless and efficient.
